

Pico Laser Tattoo Removal Machine Picosure Picosecond Laser Machine

Item Number: BL-204

Introduction

Picosecond laser machine for tattoo removal & skin rejuvenation. Triple-wavelength, high-energy pulses for faster results with minimal downtime. Safe for all skin types.

[Learn More](#)

Parameter	Picosecond Laser	Traditional Nd Yag Laser
Pulse Duration	1ps (10^{-12} s)	1ns (10^{-9} s)
Treatment Speed	90x faster	Baseline
Power	20x stronger	Baseline
Wavelengths	755nm, 1064nm, 532nm, 1320nm	Typically 1064nm
Max Energy	2000 mJ	1500 mJ
Melanin Clearance	Dust-like particles (easy metabolism)	Larger particles (harder to metabolize)
Treatment Sessions	1-3 sessions	4-6 sessions
Skin Damage	No surface damage (755nm)	Possible surface damage
Cooling System	Advanced: water + air circulation, 4 fans	Basic
Construction	Alloy steel housing, stainless steel frame	Often glass/plastic housing
Special Features	7-arm articulating device, focusing lens technology	Conventional delivery
