Application	Description	Key Benefit
Facial Lifting & Contouring	Full-face treatment using 1.5–4.5mm cartridges to lift sagging cheeks, define the jawline, and soften nasolabial folds.	Non-surgical facelift with visible tightening in one session, improving over 2–3 months.
Periorbital Rejuvenation	Patented 2.0mm cartridge targets crow’s feet, under-eye bags, and brow ptosis, delivering energy safely around the orbital rim.	Reduces fine lines and lifts the eye area without thermal damage to ocular structures.
Neck & Décolletage Revitalization	1.5mm and 3.0mm probes treat horizontal neck lines and crepey chest skin, a common area of early aging.	Smooths texture and restores firmness, often with a single pass.
Double Chin & Submental Fat Reduction	4.5mm and 6mm cartridges concentrate energy on supraplatysmal fat, disrupting adipocytes and tightening the overlying skin.	Contours the chin and neck profile without lipolysis injections or surgery.
Body Contouring & Circumferential Reduction	9mm and 13mm probes target stubborn fat on the abdomen, flanks, and thighs, reducing circumference and improving skin laxity.	Non-invasive fat cell destruction with gradual slimming over 3–12 months.
Cellulite Smoothing	Deep cartridges treat the fibrous septae and fat globules responsible for “orange peel” dimpling on thighs and buttocks.	Visibly improves skin surface evenness and texture, boosting patient confidence.
Vaginal Rejuvenation & Tightening	3.0mm and 4.5mm vaginal probes contract the mucosal and muscular layers, addressing laxity often due to childbirth or aging.	Enhances sexual function, increases natural lubrication, and reduces urinary stress incontinence symptoms.
Post-Surgical Skin Retraction	After liposuction or abdominoplasty, HIFU accelerates skin shrinkage and collagen remodeling, improving contour smoothness.	Speeds recovery and reduces surface irregularities, optimizing surgical outcomes.

Parameter	Value
Model	BL-512
Technology	MMFU (Micro & Macro Focused Ultrasound)
Functions	Skin tightening, wrinkle removal, body contouring, vaginal tightening
Voltage	110–240V, 50/60Hz
Treatment Areas	Full face, lower face, décolletage, abdomen, arms, thighs, buttocks, vaginal area
HIFU Shots per Cartridge	20,000
Cartridges Included	Face/Body: 1.5mm, 2.0mm, 3.0mm, 4.5mm, 6mm, 9.0mm, 13mm; Vaginal: 3.0mm, 4.5mm
Dot Spacing	5.0–25mm
Energy Output	0.1–3.0 J
Display	10.4-inch Touchscreen

Parameter	Value
Gross Weight	18.0 kg
Package Size	54 x 46 x 46 cm
Warranty	2 Years
